SCRUM Meeting 3 for **Gang 61 Project 3**
Prepared by: Rithvik Boyana
Meeting Date: 11/10/2025

Meeting Attendees

1. Rithvik Boyana
2. Mason Mock
3. Brandon Perez

Meeting Agenda Items

- Finalize frontend structure
- Implement Google OAuth for all users
- Host backend
- Connect frontend to backend through REST API structure

Status Update Since Last Meeting

Accomplishments:
- Finished backend functionality for kiosk view
- Developed the basic frontend structure

Tasks Completed:

Task Description	Assigned to	Completed? (yes/no)
Completed the backend routes required by the kiosk view	Brandon	Yes
Created the React app and updated templates and modules to add the required components	Rithvik	Yes

Before The Next Meeting

Plans:
- Create demo video
- Create GitHub release

Task Assignments:

Task Description	Assigned to
Record and publish the demo video for kiosk functionality	Everyone
Create and submit the GitHub release for Sprint 1	Rithvik

Minutes from Previous Meeting

The group talked about using Render to host the frontend (and eventually deploy the backend as well) and as a result walked through the steps for accomplishing this. It included setting up a web service, adding environment variables, specifying build and run commands, etc. Once the frontend (currently a template page as frontend layout was not developed until meeting 3) was hosted, the team discussed the backend structure of the project. This includes identifying the routes that the kiosk will need, the required database connection and queries, and the functions that the backend needs to handle. Once this was decided, the team started working on the backend itself, as finishing this first would allow our frontend to seamlessly connect and use real data for testing purposes.
